

# IMPROVING DATA LITERACY WITH

Sense® &

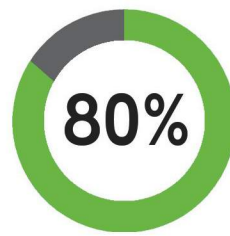

BOS Explorer™

Key business decision makers aren't confident their ability to read, work with, analyze and argue with data

Source: www.dataliteracyproject.org

By the year 2020, 80% of organizations are expected to roll out internal data literacy initiatives to up-skill their workforce.

Source: Gartner

## PROBLEM

Limited ability for business users to explore data:

- Time Consuming
- Requires building custom visualizations
- Long turnaround time by developers
- Lack of visibility into supporting data
- Slow decision-making processes

## WHAT IF

Business users could simplify data exploration:

- Get answers fast without waiting
- Autogenerated customizable visualizations
- Save development costs
- Intuitive, self-service capability
- Accelerate decision-making processes

## That 'What If' is BOS Explorer™ by BlueOrbit Solutions

Accelerated, self-service visual analysis tool for Qlik Sense® business users.

### OVERVIEW

Add-in for Qlik Sense

Integrates with Any Qlik Sense Applications

Suite of Visual Analysis Tools

Enhances Qlik Sense User Experience

### BENEFITS

- » Immediate data exploration
- » No development required
- » Pre-defined, customizable analysis tools
- » Consistent experience across all applications
- » Improves user adoption
- » Drives data literacy

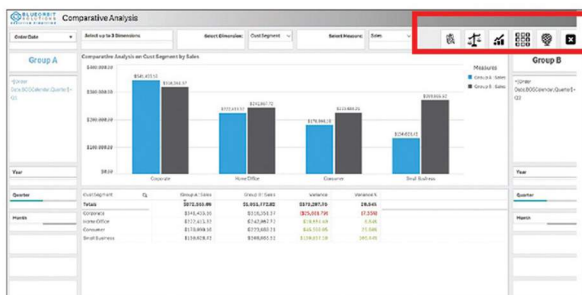

### TESTIMONIALS

"The BOS Explorer tool empowers our end users to explore data rapidly and become more data literate."

- Director, Healthcare Organization

"This tool greatly helps us increase user adoption of the Qlik platform."

- VP, Manufacturing Company
