QlikExpress™

QlikExpress™

Qlik Sense™ Qlik QlikView®

A Rapid Process Enablement Solution For Organizations Using Qlik Technology

QlikExpress™ is a complete service offering developed exclusively by BlueOrbit Solutions for new or existing customers of QlikView and Qlik Sense. The program leverages the expertise of a Certified Qlik Partner to implement development standards, establish governance, and empower users to make timely and informed business decisions.

Overcome Traditional Development Challenges To Start Data Discovery Instantly

Qlik PARTNER

QlikExpress™ comes with a suite of pre-built tools and templates that help users get a head start on creating easy-to-use analytics solutions with QlikView and Qlik Sense. In 5 guided steps, an organization can extract data from their source systems, create a data model based on best practices, and begin to access dashboards with advanced visualizations.

- **Easy-to-use tools & templates** for data extraction, modeling, and presentation
- **Standardize best practice development** through a guided process & methodology
- **Universal data extractor** accepts all commonly used data sources
- **Establish governance** through reusability, auditing, maintainability, and security
- **Increase user adoption** by empowering business users through self-service

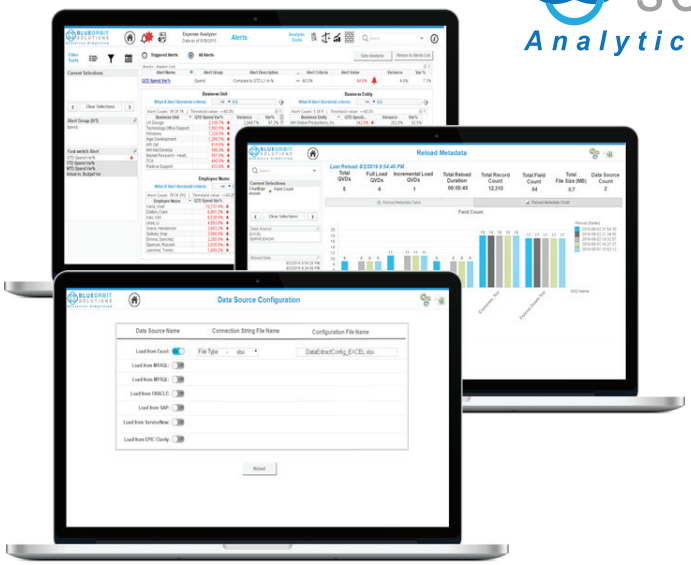
BLUEORBIT SOLUTIONS
Analytics Simplified

QlikExpress™



The QlikExpress™ 5-Step Process

In just 5 simple steps, remove the Qlik application development complexity and jump-start your data discovery instantly.

Step 1: Initiate

Deploy QlikExpress tools and templates onto Qlik desktop or server to jump-start new application development.

Step 2: Configure

Configure data sources, connections, dimensions, expressions, alerts, reports, and security.

Step 3: Extract

Automated full or incremental Qlik data (QVD) files without scripting. Complete audit of extract metadata.

Step 4: Data Model

Consolidated data model from multiple sources, library of metrics/KPIs, user/data security. Audit of data model metadata and metrics/dimensions.

Step 5: Presentation

Built-in self service tools for ad-hoc, comparative, trend, and grid analysis. Customizable layout templates for guided navigation. Integrated on-demand NPrinting reports and built-in metrics rules and alert functionality.
